

The Now Lifestyle **MUST DO CHECKLIST** for Business Success

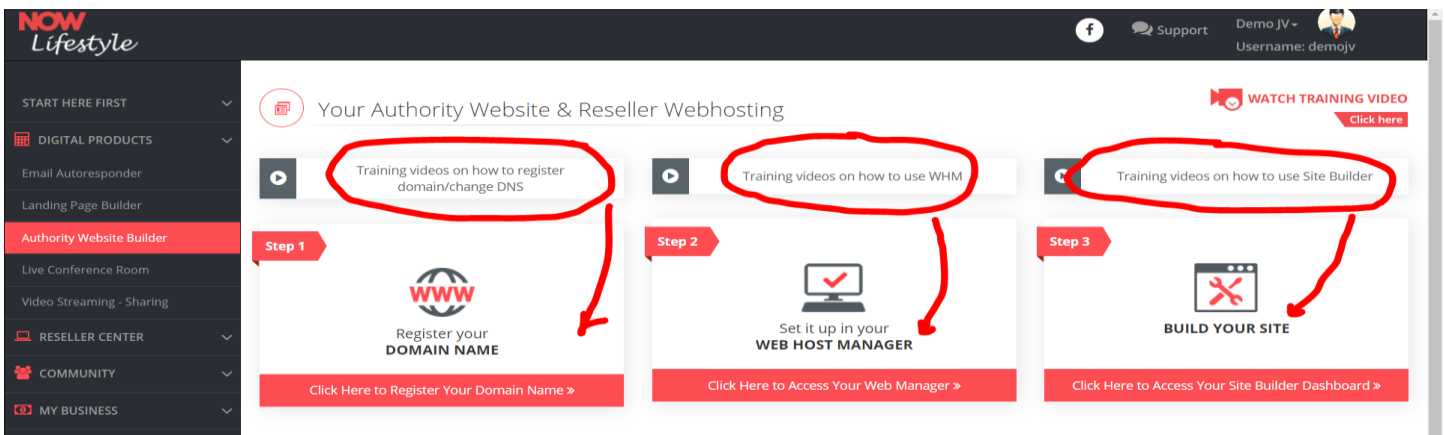

Print this checklist off and then place a check or an "X" next to each task as you complete each action if you want to get up and running with the Now Lifestyle. This is a generic list without going into detail as far as what each section entails or how to use that section...Not to worry though because in each section we have training videos to show you exactly how to carry out a certain task. For example, creating a follow up email or joining the Facebook group (We are continually updating the member area for ease of use so this might look slightly different depending on when you downloaded it)

AUTHORITY WEBSITE BUILDER

Authority Website Builder: This is where you can create high quality websites connected to a domain name, host your data, create a blog and much more. Be sure to watch the training videos in each section to learn more.

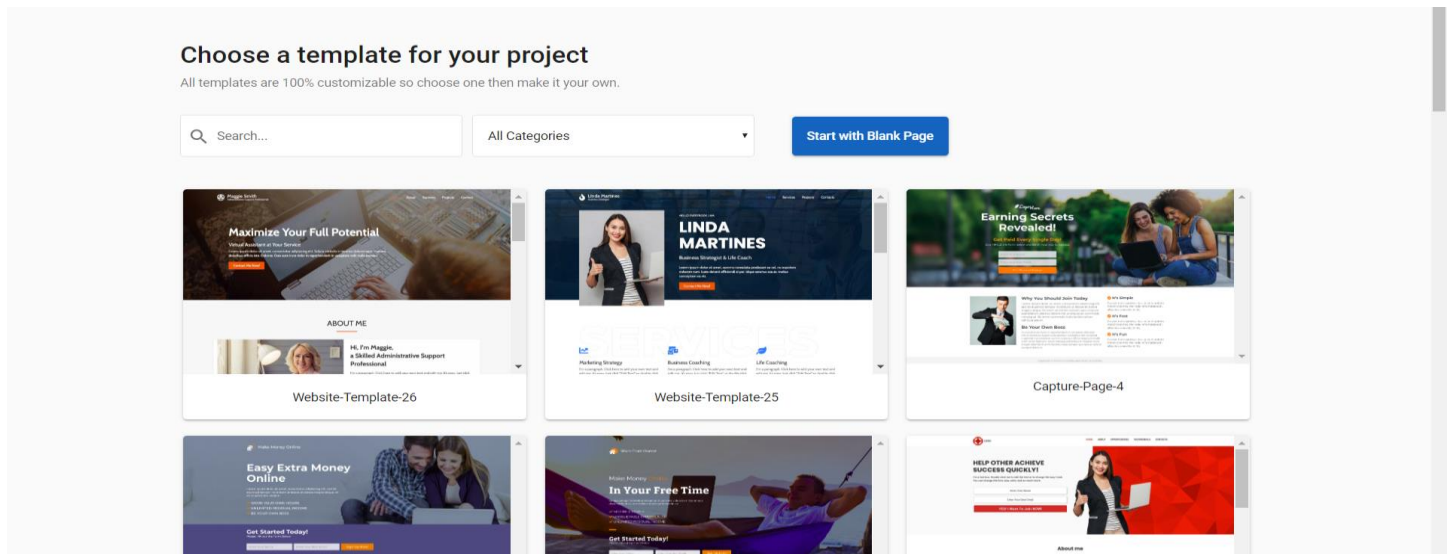

Watch the training videos in each section to learn more and please submit a request if you have other training or recommended topics and videos to put into this training section

___ **Register Your Domain:** This is where you can purchase a domain or learn to transfer the DNS settings to point your domain (if purchased elsewhere) to the NLS Web Host Manager (WHM).

___ **Web Host Manager (WHM):** This is where you will actually host your website and potentially the websites of others if you act as a reseller and work with other businesses to host their website. You can also create your blog with this section as well as host any data/files/reports that would be promised to people after they opt into your website.

___ **Site Builder:** This is where you can build your high quality website and connect it with your Email autoresponder campaigns to build your leads list, connect to a blog or even create a funnel connected with pages built in the Landing Page Builder. Choose from many templates and edit to your desires.

Remember, no one should think they need to or can be able to learn this all in one day or week for that matter. Try to eliminate information overload and do a few tasks a day, then share what you have learned with your social media or other connections (and your LINKS!!!)

Being consistently consistent is what will help cause you to continue improving and growing your business. You get out of it what you put into it.

In addition to sharing on your own pages, be sure to share in the NLS FB group what you are learning and if you have a question or are stuck on some idea/concept, be sure to be as specific as you can so we can help.
